Password Setup

You are immediately prompted to setup a new password. Enter a new password and then press the OK button.

Asset Keeper Pro - Password Setup						
Since this is the first time you've started this application OR you want to require a password when starting this application, you will need to enter a password.						
The password MUST be entered whenever you start this application; however, you can disable this in the Preferences.						
You should write this password down in a safe place because if it is lost, you may not be able to access your data.						
Password						
Re-enter Password						
Password Requirements:						
Passwords are CASE sensitive. No spaces allowed. Enter any characters - min 6 and max 15.						
(You can change these settings on the preferences screen.)						

Write password down

You will be prompted to write the password down so that you can re-enter AKPRO with the new password.

Change or turn off password request

You will need to go to the Preferences screen in order to change your password or turn off password request.
